FRANCIS GBOHUNMI

Backend Software Engineer | C# / .NET | APIs | Real-Time & Offline Systems

Lagos, Nigeria | +234 812 492 2244 | francisgbohunmi@gmail.com | dev-francis.tech

PROFESSIONAL SUMMARY

Backend-focused Software Engineer building reliable APIs and product systems with C#, ASP.NET Core, .NET 8/10, PostgreSQL, SQL Server, and SignalR. Experience spans fintech, enterprise ERP, edtech, music intelligence, personal safety, private social products, and farm operations. Skilled in Clean Architecture, CQRS, authentication, idempotent workflows, background jobs, offline sync, and API testing. I design around durable state, explicit failure handling, and clear contracts across web, mobile, and backend teams.

TECHNICAL SKILLS

Languages & Backend: C#, ASP.NET Core, .NET 8/10, Entity Framework Core, Python, TypeScript, SQL, LINQ

Architecture & APIs: Clean Architecture, Modular Monoliths, CQRS (MediatR), REST APIs, JWT, SignalR, Background Jobs

Data & Infrastructure: PostgreSQL, SQL Server, SQLite, Redis, Docker, Azure, AWS (EC2, S3, RDS, Lambda)

Product Engineering: Offline-First Sync, Idempotency, Real-Time Systems, RBAC, Push Notifications

Tools & Quality: Git, GitHub, Visual Studio, VS Code, xUnit, pytest, API Testing, Manual and Regression Testing

PROFESSIONAL EXPERIENCE

Backend Developer / QA Tester | Model Carbon Ltd **Dec 2025 - Jun 2026**

- Built and validated backend services and REST APIs for **Converge ERP**, developed for Heirs Technologies under the UBA Group, using established modular .NET architecture and integration contracts.
- Debugged cross-service workflows, reviewed code, tracked regressions, and performed manual QA with frontend, AI, and QA teams ahead of releases.
- Supported delivery from requirements and API documentation through integration, testing, and deployment readiness.

Backend Developer | Kuda MFB **Jun 2025 - Sep 2025**

- Delivered backend workflows for **premium subscriptions, referral rewards, and loyalty** using ASP.NET Core and SQL Server, with reliable transaction rules and account state.
- Collaborated with senior engineers to translate business goals into API contracts and launch engagement features for digital banking customers.
- Implemented and tested eligibility, duplicate-action, reward issuance, and state-transition edge cases to improve release confidence.

.NET Developer | X3 Lab **Jan 2025 - Jun 2025**

- Engineered core ASP.NET Core API endpoints and business logic for a university-focused edtech platform.
- Built course registration, result management, and academic progress workflows with validation and role-aware access to student records.
- Translated product requirements into reliable backend services and coordinated API integration with the frontend team.

PROJECTS

NoteFusion | *.NET 10, Python / ONNX, Expo, PostgreSQL*

- Designed a three-tier music transcription system where Expo clients call a .NET API that orchestrates a private FastAPI and ONNX worker and persists job results.
- Built pitch and timing post-processing, key-aware movable-do solfa mapping, confidence handling, editable key correction, and MusicXML and MIDI output.

Recchx | *.NET 8, React Native, SignalR, PostgreSQL*

- Built a personal safety network with trusted circles, background location, safe-arrival timers, emergency contacts, and covert SOS alerts.
- Designed SOS-first offline queues, bounded location snapshots, idempotent batch sync, Ghost Mode privacy, and durable REST state with SignalR updates.

2gether | *.NET 10, Next.js, SignalR, PostgreSQL*

- Built an invite-only couple application with validated partner linking, messaging, cycle tracking, live presence, location, and synchronous games.

SBZ Farms | *.NET 10, Expo, CQRS, PostgreSQL, SQLite*

- Built an operations platform for birds, eggs, feed, health, sales, payroll, alerts, audit history, and role-based access.
- Implemented a SQLite offline source of truth, ordered outbox replay, token refresh, exponential backoff, dead-letter handling, notifications, and CSV backups.

EDUCATION

Bachelor of Technology (B.Tech), Statistics Akure, Nigeria

Federal University of Technology, Akure (FUTA)
